backbone cyclized somatostatin analogs, having somatosta-  
tin receptor subtype selectivity are disclosed. These patterns  
or receptor subtype selectivity provide compounds having  
improved therapeutic utility. Methods for synthesizing the  
somatostatin analogs and for screening of the somatostatin  
analogs are also disclosed. Furthermore, pharmaceutical  
compositions comprising somatostatin analogs, and meth-  
ods of using such compositions are disclosed.**18 Claims, 5 Drawing Sheets**
